EXILIM EX-FH100

HIGHLIGHTS

24 mm wide-angle lens
The combination of 24 mm wide-angle lens* and 10x optical zoom makes the EX-FH100 the perfect companion for every occasion, providing great scope to capture your loved ones, the most beautiful sights or a romantic sunset.

10x optical zoom with mechanical image stabiliser
It's easy to zoom in on those special moments: the 10x optical zoom can bring even the most distant subjects right up close, while the mechanical image stabiliser automatically reduces blurring.

High-speed serial picture recording
Take up to 40 photos per second with the high-speed serial picture recording function.

High-speed film recording
The EX-FH100 can shoot high-speed film recordings of movements that are too fast for the naked eye, enabling them to be played back in ultra-slow motion.

High-speed back-illluminated CMOS sensor
Dark rooms, twilight or poor lighting conditions? You can still take outstanding photos!

10.1 megapixels (effective)
The new High-speed back-illluminated CMOS sensor in the 10.1 megapixel EX-FH100 allows you to take sharp, detailed photos in full brilliant colour.

The High Speed EXILIM EX-FH100 is available to buy from specialist dealers, shopping centres, electrical goods stores and all good shops.

*equivalent to 35 mm film
